SOG -- FYI, Tim O'Laughlin (an attorney representing the Oakdale Irrigation District) shared news of a potential spring release on the Stanislaus above and beyond the minimum Appendix 2-E flows. See his e-mail, forwarded below.

Whether the release occurs is subject to a WIIN Act determination under Section 4001 (as Tim notes) and also depends on CVP/SWP Delta export capacity and policies.

The OID and SSJID are contemplating making additional releases over Appendix-2e flows for April-May. The amount of additional water is contemplated to be 100,000 af. SLDMWA and DWR will pay for the release, subject to the release of this additional water being diverted pursuant to Section 4001 of the WIIN Act.

The parties are currently looking at starting the additional releases on April 15, 2018.

I will be on the conference call next week to answer any questions.
